# Tucson Water's Commercial & Multi-Family Toilet Rebate Program

**The Toilet Rebate Program is for all Tucson Water customers with a toilet manufactured prior to 1991 that uses 3.5 gallons/flush or more.**

Tucson Water is committed to helping our customers become more water efficient, both indoors and outdoors. Bathroom water use represents the largest indoor use of water of an average commercial or multi-family property. Replacing older toilets with high-efficiency models is a cost-effective way to conserve our precious water supplies.

Tucson Water is offering a Toilet Rebate program to encourage and assist customers who wish to purchase and install new, more efficient toilet fixtures. To ensure the new fixtures save water and work effectively, Tucson Water is partnering with the U.S. Environmental Protection Agency's (USEPA) WaterSense Program, a national water efficiency certification program.

The Toilet Rebate Program is available to all Tucson Water customers who currently have a toilet **manufactured prior to 1991 that uses 3.5 gallons/flush or more**. Customers must meet the following guidelines in order to qualify for the Rebate program:

- Toilets must be installed on properties receiving water from **Tucson Water**.
- Only fixtures purchased after July 7, 2008 qualify for a rebate.
- Rebate amount is limited to **75% of purchase price with a maximum of \$100 per toilet**. There is no limit on the number of fixtures replaced per property. The rebate covers only the purchase cost of the tank, or flushometer valve, and bowl and does not include tax or additional supplies.
- Only High Efficiency Toilet (HET) fixtures approved by the USEPA WaterSense Program or flushometer valve/bowl combinations rated by Maximum Performance (MaP) Testing at 800 grams or more qualify for rebate. **An HET fixture uses 1.3 gallons per flush or less.**

**Rebate amount is limited to 75% of purchase price with a maximum of \$100 per toilet.**

- Rebates are provided to encourage the voluntary early replacement of older, less efficient **pre-1991 toilets**. Fixtures replaced as part of a general construction permit (such as for a structural change or alteration) do not qualify for rebate.
- Fixture must replace a **3.5 gallon per flush or greater volume toilet**.
- Old toilet fixtures must not be used again and must be rendered inoperable.
- Participants in the rebate program must consent to an inspection of the property to verify purchase and installation of HET fixtures.

**An HET fixture uses 1.3 gallons per flush or less.**

**Please check the list of approved WaterSense toilets on the USEPA's website:  
[www.epa.gov/watersense/pp/find\\_het.htm](http://www.epa.gov/watersense/pp/find_het.htm)**
